
InnoCielo TeamWork

InnoCielo TeamWork is the premier content management add-on for engineering workgroups. As the next generation of InnoCielo WorkFlow, the world's most popular content management solution for engineering workgroups, InnoCielo TeamWork incorporates more than 10 years of experience with workgroup support and productivity for day-to-day design tasks.

New Features in InnoCielo TeamWork 2008

Microsoft Outlook Integration

For both InnoCielo Meridian Enterprise and InnoCielo TeamWork users, the new 2008 versions will provide Microsoft Outlook integration. A new toolbar inside Microsoft Outlook enables storing email messages and their attachments directly into the InnoCielo vault.

User Management

InnoCielo TeamWork 2008 also provides the capability to define users and groups in combination with Microsoft Active Directory, facilitating integration in large enterprises. Users and user groups can both be replicated from corporate user data present in Microsoft Active Directory and can be created directly in the InnoCielo Administrator utility without burdening corporate user administration resources.

Data Import Tool

Also new to InnoCielo TeamWork 2008 is the extended Data Import Tool which allows the easy importing of batches of documents and their metadata by the InnoCielo user.

Upgraded CAD Support

InnoCielo TeamWork 2008 also comes with updated application integration support for:

- Microsoft Office 2007
- AutoCAD 2009
- Autodesk Inventor 2009
- AutoCAD Mechanical Desktop 2009
- AutoCAD P&ID 2008
- SolidWorks 2008 SP 0.0-3.1

Other Features

Full-Text Search

InnoCielo TeamWork offers full-text search using Microsoft Index Server technology.

Fast Access to ALL Your Documents

- Locate and verify the correct versions of documents in a fast and reliable manner
- Navigation Views make it possible to organize your documents according to criteria you specify, such as by author, by project, alphabetical order, and more
- All searches can be saved, reused, and shared with others in the workgroup, saving time in the future

Integration with your Favorite CAD Software

- Full support for AutoCAD, Mechanical Desktop, Autodesk Inventor, MicroStation and SolidWorks
- Title block integration
- Manage the relationships between design and external reference files
- Access InnoCielo TeamWork from within your CAD software

Collaborative Platform

- Redline documents to communicate changes
- Access all your drawing information via the Internet, WAN, or LAN
- Use the Web to share your design with fellow team members
- Client/Server technology to enable remote access

Viewing, Printing and Reporting

- View more than 250 file formats without needing the native application installed
- Print draft copies of these files for reference or review
- Reporting of searches, projects and milestones
- Read-only web access for viewing and printing
- Easy to learn and use

Automated Revision Control and Archiving

- Automatically track revisions of your drawings
- Find all previous versions of a document for review
- Visually compare different versions of a design
- Revision control over derived versions
- Automatic archiving of design data

2D to 3D Support

- Support for Autodesk Inventor, Mechanical Desktop and SolidWorks
- Reference management tools to find external parts and assemblies
- Control external parts and assemblies independent of location
- Keep it all organized in InnoCielo TeamWork's intuitive interface

There is More...

- Easily set up document workflows per document type
- Automatic tracking of revisions
- Integrates with all of your Windows applications
- Low cost of deployment and ownership
- Easy to administer
- Robust security using a flexible role based security system
- Sophisticated File and Record locking
- One screen view of all document information
- Automatic links to CAD packages
- Launch any application
- Find your documents easily with rapid search tools
- Print your documents without the native application

- Automatic document naming convention (field-path)
